

This architectural section drawing illustrates a building and a bridge. The building on the left features a grid facade and is labeled 'A' in two locations. The bridge on the right consists of multiple arches and is labeled 'B' in two locations. A small rectangular structure is visible on the far right.

A diagram illustrating the height requirement for the safety net. It shows a person standing next to a truck. A vertical dimension line indicates a height of 150 cm. The truck is shown from the rear, and the safety net is depicted as a series of vertical bars extending from the ground to the height of the person's head.
